

FEATURE . " PANEL

IN THIS EDITION

DESIGNED FOR BEAUTY.
BUILT FOR REAL SPACES.

As the seasons shift, so too does the palette of the spaces we’re creating.

We’re seeing a clear move toward deeper, more expressive finishes, particularly in black walnut across both our veneer and laminate ranges. Richer tones are taking the lead, bringing a sense of warmth, depth, and character that feels both grounded and refined.

There’s a quiet departure from the overly pristine aesthetic. In its place, a more layered and considered approach. One that embraces natural variation, mood, and materiality.

In this edition, we share three recent projects that reflect this shift. Spaces where finishes have been used to create contrast, intimacy, and a more elevated atmosphere.

Let their homes inspire your next project.

PANEL USED
RIPPLE 150 WOOD PANEL [WALNUT]

THORNTON ROAD RESIDENCE

A new home by Yellowfox, where our Ripple 150 in Walnut is expressed as a sculptural bedhead within the master suite. Set in Cambridge, Waikato, the interior is defined by strong architectural lines, restrained forms, and a rich, textural palette.

YELLOWFOX
FERNLEA CABINETRY AND JOINERY
UNTITLED STUDIO

The rhythmic repetition of the ripple profile introduces depth and tactility, offsetting the solidity of surrounding materials while maintaining a disciplined, cohesive language. The result is a space that feels grounded, composed, and architecturally resolved.

PANEL USED

RIPPLE 150 WOOD PANEL
[WALNUT]

A refined, sculptural panel with timeless appeal. Ripple 150 features a softly scalloped profile and raw walnut veneer face, bringing warmth, depth, and natural elegance to the interior. Whether in a lounge, dining room, bedroom or commercial fit-out, this panel delivers subtle drama with a clean, architectural finish.

COASTAL HOMES, NZ

A considered build by Coastal Homes NZ, where our Batten Laminate Range defines strong architectural lines across the entry, master bedroom, and kitchen. The repetition of vertical battens introduces rhythm and structure, creating a cohesive material that flows throughout the home. The result is an interior that feels intentional, balanced, and refined.

BATTEN 10 T&G WOOD PANEL [OAK]

COASTAL HOMES, NZ

Throughout the home, the Batten 10 profile works quietly, lining walls, framing openings, and lending each room a sense of considered depth. It's the kind of detail that doesn't announce itself, but is immediately felt.

PANEL USED

BATTEN 10 T&G
WOOD PANEL [OAK]

The Feature Panel Batten 10 range comes prefinished and features narrow 10mm battens in a rich oak-look finish. Defined by its soft, ashy woodgrain and elegant proportions, the system is designed to create a cohesive architectural finish, supported by a full accessory system including matching corner panels, end caps, skirting, and bullnose trims.

Thoughtfully considered for both residential and commercial applications, Batten 10 delivers a clean, resolved aesthetic that is both refined and easy to install.

SAINT MARYS BAY

A strong yet sophisticated kitchen renovation designed for contemporary family living. Warm timber cabinetry paired with sculptural stone surfaces creates a grounded and refined aesthetic.

Custom-stained Feature Panel in the Profile Flow 30, paired with VidaSpace Manhattan Oak timber veneer cabinetry and Yamuna porcelain stone introduce depth, texture, and material contrast, resulting in a polished, modern kitchen that feels both enduring and highly functional.

TRUECRAFT FLOW 30 WOOD PANEL [OAK]

Throughout the kitchen, the TrueCraft Flow 30 Wood Panel in Oak runs as a unifying element, bringing the warmth and grain of real timber into dialogue with the stone and cabinetry. Applied with intention, it adds the tactile layer that anchors the space and gives the material palette its sense of depth.

PANEL USED

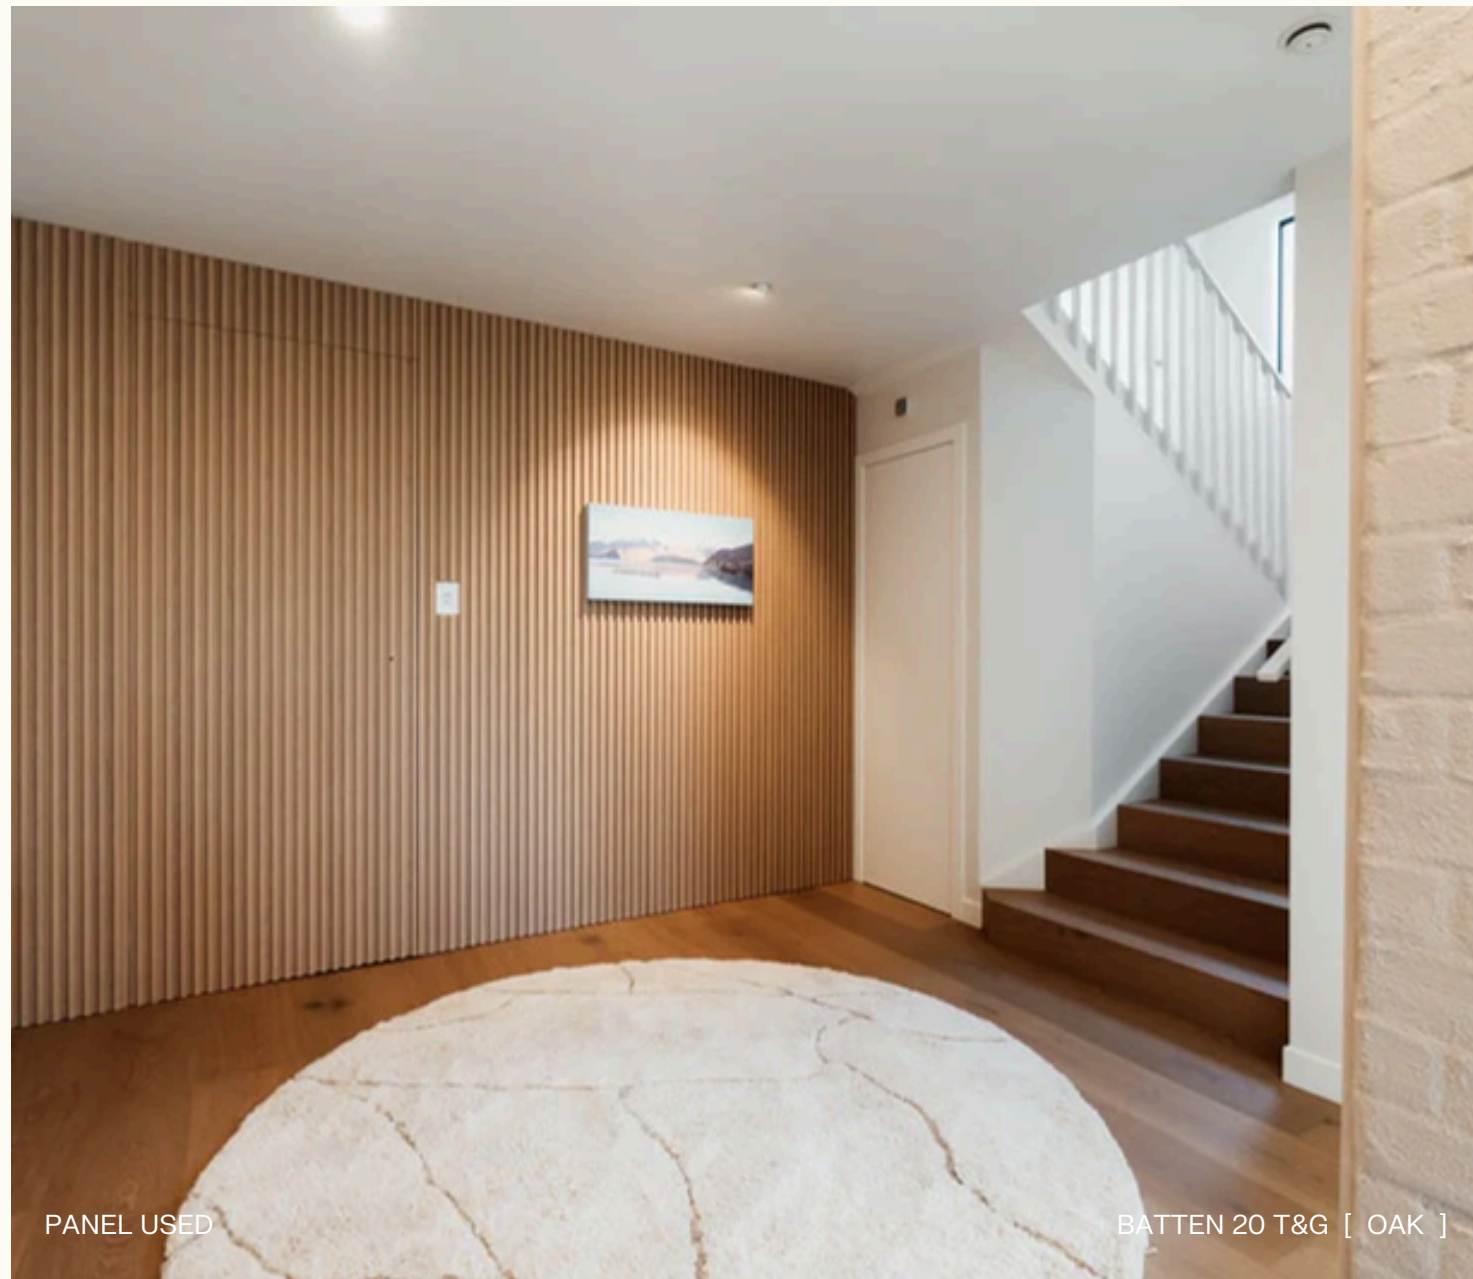

TRUECRAFT FLOW 30
WOOD PANEL [OAK]

Flow 30 Solid Oak is crafted from a genuine 5mm solid red oak face, delivering the depth, grain and character only real timber can offer.

Engineered for stability and long-term performance. With a 5mm solid oak face on a 16mm MDF core, it offers the durability of solid wood with the stability and consistency required for high-use interiors.

SURFACE RANGE

PANEL USED

BATTEN 20 T&G [OAK]

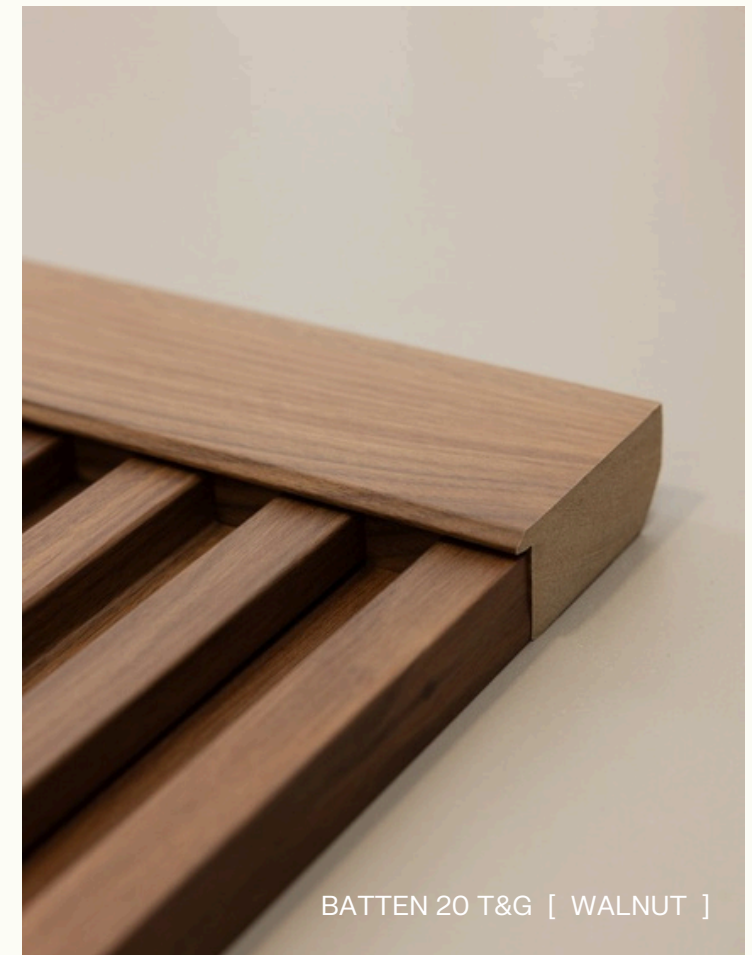

Consistent.
Durable.
Effortless.

Crafted with a timber-inspired woodgrain laminate finish over a stable pine core, the Surface Range delivers a consistent, refined finish with no coating required.

A concealed tongue-and-groove system ensures seamless installation, while matching trims complete the look for a result that feels considered from every angle.

FINE LINES RANGE

PANEL USED

RIPPLE 47 WOOD PANEL [PRIMED]

LEGACY 190 [PRIMED]

Precision-machined MDF with a pre-primed white face, ready for paint. Suitable for wall, ceiling, and joinery applications in both residential and commercial spaces, and designed with a seamless tongue and groove system.

PRIMED FLEX RANGE

Designed for curves, crafted for detail.

RIPPLE 47 FLEX [PRIMED]

WAVE 33 FLEX [PRIMED]

Designed for both flat and curved surfaces, the Primed Flex Range is an ideal solution for feature walls, columns, and bespoke interior detailing. Built with a flexible backing, it allows for smooth installation across concave and convex surfaces while maintaining a clean, consistent finish.

PANEL USED

RIPPLE 47 FLEX [PRIMED]

FLOW RANGE

Natural timber,
refined into form.

Crafted in premium timber veneer profiles, each panel is supplied raw for custom coating, giving full control over the final finish. Suitable for both flat and curved applications, with Group 1-S fire rating achievable where required for commercial applications.

RIPPLE 60 WOOD PANEL [BLACK WALNUT]

RIPPLE 150 WOOD PANEL [OAK]

TRUECRAFT RANGE

Real oak. Engineered
for possibility.

Featuring a 5mm solid red oak face bonded to either a flexible plywood or 16mm MDF core, each panel is CNC-machined directly from solid oak to deliver exceptional durability and a premium solid timber finish. Designed primarily for flat wall applications and well-suited to high-use residential and commercial environments, the range opens up new creative possibilities in solid timber design.

TRUECRAFT BATTEN 35 WOOD PANEL [OAK]

TRUECRAFT FLOW 30 WOOD PANEL [OAK]

Architectural lining systems designed for streamlined installation and refined interior outcomes. Simply cut, fix, and finish. With consistent quality across every panel, designs are realised exactly as intended.

Engineered for durability and crafted from premium materials, Feature Panel delivers enduring performance across residential, hospitality, retail, and commercial environments.
